4th Annual 2012 Stroke Symposium
"Insight into the Complicated Strokes"
May 18, 2012
8 am - 12:30 pm
Perkin Auditorium, Norwalk Hospital

---

John Dempsey Hospital
ATTN: Nursing Education Dept.
263 Farmington, CT 06030-1930
4th Annual Stroke Symposium 2012

The 2012 4th Annual Stroke Symposium will explore the more complicated strokes both hemorrhagic and ischemic. The deficits are life altering and require a commitment from the healthcare professionals caring for the stroke patient in optimizing patient outcomes.

The lectures will focus on cutting edge treatments, management, best clinical practices and rehabilitation of the newly diagnosed stroke patient. A case study of a hemorrhagic stroke with the interdisciplinary team take the audience through the process from nursing to physical therapy, occupational therapy and speech therapy discussing how each discipline’s role is critical in the recovery process.

One of the highlights of the program will be having one of our stroke survivors speak about his experience from the beginning to current. We will also be welcoming a guest speaker, Dr. Michael Stiefel, from Westchester Medical Center to discuss endovascular treatments for both hemorrhagic and ischemic strokes. At the break session we will be featuring integrative medicine information which is offered at the hospital and a culinary menu of healthy choices for breakfast by our own Chef Jeff. At the conclusion of the symposium, all speakers will participate in a panel discussion answering questions from the audience.
